Contents of Volume 41

No. 1

Research Articles

M. Wollenweber, J. Polster (Germany)
Evaluation of data produced by optode arrays under flow injection analysis (FIA) conditions using a partial least squares method (PLS2) 1

H. Zhan (USA)
A method for quick measurement of protein binding to unilamellar vesicles 13

T. Cserháti, E. Forgács (Hungary)
Influence of salt and pH on the hydrophobicity parameters of antisense nucleosides studied by reversed-phase thin-layer chromatography and multivariate mathematical–statistical methods 21

M.A. Jenkins, S. Ratnaike (Australia)
Five unusual serum protein presentations found by capillary electrophoresis in the clinical laboratory 31

L. Holmquist, O. Vesterberg (Sweden)
Luminescence immunoassay of pollen allergens on air sampling polytetrafluoroethylene filters 49

Short Note

K. Dill, L.H. Stanker, C.R. Young (USA)
Detection of salmonella in poultry using a silicon chip-based biosensor 61

Calendar of Events 69

Instructions to Authors 71

Nos. 2–3

Editorial 73

Review Articles

P.G. Righetti, C. Gelfi (Italy)
Capillary electrophoresis of DNA in the 20–500 bp range: recent developments 75

Y. Baba (Japan)
Capillary affinity gel electrophoresis: new technique for specific recognition of DNA sequence and the mutation detection on DNA 91

V. Dolník (USA)
DNA sequencing by capillary electrophoresis (review) 103

H.-m. Pang, V. Pavski, E.S. Yeung (USA)
DNA sequencing using 96-capillary array electrophoresis 121

Y. Endo, C. Yoshida, Y. Baba (Japan)
DNA sequencing by capillary array electrophoresis with an electric field strength gradient 133

Y. Kiba, Y. Baba (Japan)
Unusual capillary electrophoretic behavior of triplet repeat DNA 143

M. Ueda (Japan)
Dynamics of long DNA confined by linear polymers 153
